### Scan Microfilm Direct To Your Computer

The ScanPro1000 makes it easy-to-scan all the information stored on microfilm and micro opaques. The featured optical 7X to 54X zoom lens means you don't have to stop your look-ups to change lenses. The many other standard features like automatic focus, exposure control, and optical image rotation mean you can complete your look-ups and research quickly and efficiently. And, using the included software, you can annotate, network, e-mail, save to other media, and print all of your scans, right from your PC.
